

INTERNATIONAL AMATEUR RADIO UNION
REGION 3
MONITORING SYSTEM REPORT

October, 2006

B.L. Manohar Arasu VU2UR

Almost all the countries grant amateur radio licences, after taking an examination of the candidate in “interference free communications”, in the allotted bands. This is not so, in the case of many Government departments and other services like the Fishing Trawlers, who operate with the permission (?/!) of their Government Departments, well inside the amateur bands. Their equipment with possibly, crystal controlled channels, have some amateur radio frequencies also in them. These illiterate operators do use these clear amateur channels and effect their communications with possibly automatic antenna tuners and what not. All at their disposal, because their Administration never bothered or intentionally allowed them to operate in the internationally allocated non-sharing amateur bands. This is what is happening with the many taxi drivers, loggers, fishing trawlers, government departments etc., The Monitors have to bear these interferences and keep reporting, but, with NO SUCCESS of any of these intruders moving out of our bands. Please keep a watch and report, so that all the other monitors understand what is happening on the bands.

This month's contributors:

ARSI: VU2DCT, VU2UR

JARL: JA2ANM, JA2CNT, JA2WO, JI2GPM, JA0AD
